

Release Notes – Maintenance Planning

Releasedetails

Product: Maintenance Planning

Releasedatum: 21 april 2026

Type release: Major Release

Omgeving: Productie

Samenvatting

Deze release introduceert drie belangrijke nieuwe functionaliteiten, aangevuld met een groot aantal bugfixes en verbeteringen op het gebied van prestaties en gebruiksvriendelijkheid.

Ondersteuning voor NEN 2767-2:2025

Het is nu mogelijk om de vernieuwde norm **NEN 2767-2:2025** toe te passen binnen het volledige Maintenance Planning-proces. De ondersteuning omvat onder andere inspecties, conditiemetingen, de vervalwizard (Decay Wizard) en het beheer van referentiegebreken.

Excel Import en Export

Gebruikers kunnen nu objecten en gerelateerde gegevens importeren en exporteren via Excel. Hierdoor wordt het eenvoudiger om grote hoeveelheden data aan te maken, bij te werken of te migreren buiten de applicatie.

Public API beschikbaar in Productie

De Public API is nu beschikbaar in de productieomgeving. Daarnaast zijn GUID-gebaseerde identificaties toegevoegd voor bouwkundige entiteiten. Hierdoor kunnen koppelingen met externe systemen betrouwbaarder worden ingericht, onafhankelijk van tenant-specifieke interne identificaties.

Overige verbeteringen

Naast de nieuwe functionaliteiten bevat deze release 53 opgeloste issues, waaronder verbeteringen in:

- Berekening van geaggregeerde conditiescores

- Rechtenbeheer voor externe gebruikers
- Prestaties van OP2-exporten
- Stabiliteit en algemene gebruikerservaring van de applicatie

Overzicht

- **Nieuwe functionaliteiten:** 3
- **Opgeloste bugs:** 53
- **Opgeleverde user stories:** 30

Features

Item No.	FEATURE ID	Title	Short Description	Impact
1	7373	NEN2767 2025	Ability to apply the NEN 2767 norm in maintenance planning	High
2	7385	Excel Import/Export	Support for importing and exporting construction data via Excel files	High
2	6835	Public API	Public API improvements and production release	High

Bug Fixes

Item No.	Bug ID	Issue	Resolution	Impact
1	6615	Seperate report for each object funtion is not working	Fixed and validated in this release.	Medium
2	7177	System management sub reports double columns	Fixed and validated in this release.	Medium

Item No.	Bug ID	Issue	Resolution	Impact
3	7352	Financial planning export to Excel does not display data correctly	Fixed and validated in this release.	Medium
4	7497	Project explorer won't save sorting A-Z after changes in grid	Fixed and validated in this release.	Medium
5	7565	Filter by condition issue with contains	Fixed and validated in this release.	Medium
6	7591	Classification adjustment is not visible till you refresh	Fixed and validated in this release.	Medium
7	7720	Manage overhead cost sets: delete set does not clear data and save is available	Fixed and validated in this release.	Medium
8	7740	[Timebox] 502 bad gateway issue production	Fixed and validated in this release.	Medium
9	7741	License: Client_Secret issue api	Fixed and validated in this release.	Medium
10	7745	Visual representation of dates in excel (getalnotitie - numbertotation)	Fixed and validated in this release.	Medium
11	7793	Aggregated condition score not correct on object page	Fixed and validated in this release.	Medium

Item No.	Bug ID	Issue	Resolution	Impact
12	7803	O-Prognose app is not working correctly (license errors?)	Fixed and validated in this release.	Medium
13	7805	Copy Action Successful Message Displayed but Objects Not Copied to Target Project	Fixed and validated in this release.	Medium
14	7807	Field capacity unit is empty in grids	Fixed and validated in this release.	Medium
15	7819	Excel import accepts column not in the excel template	Fixed and validated in this release.	Medium
16	7820	Unable to import .op2 file in Object management	Fixed and validated in this release.	Medium
17	7832	CVO field is editable in UI though it should be read-only	Fixed and validated in this release.	Medium
18	7846	Angular - Fix unauthorized calls	Fixed and validated in this release.	Medium
19	7849	Customer is not able to export an certain object (OP2 file)	Fixed and validated in this release.	Medium
20	7854	System Management-Viewer role is not retained after saving an External User – Viewer checkbox becomes unchecked when reopening the user	Fixed and validated in this release.	Medium

Item No.	Bug ID	Issue	Resolution	Impact
21	7855	When only System Management is enabled, only the Disciplines menu should display (External User)	Fixed and validated in this release.	Medium
22	7856	When Administrator role is given and saved, all admin-related menus should display, but the Discipline menu is not appearing.	Fixed and validated in this release.	Medium
23	7858	Production DB is not accessible using vpn (Acc & Prod)	Fixed and validated in this release.	Medium
24	7868	Custom fields for Object are not saving in Dev and Test environments	Fixed and validated in this release.	Medium
25	7871	Objects are not loading under Object Management – blank screen displayed	Fixed and validated in this release.	Medium
26	7879	Imported Excel Not Visible in Object Management After Successful Import	Fixed and validated in this release.	Medium
27	7880	Error Message Appears When Selecting Object in NEN2767 (2025) Wizard	Fixed and validated in this release.	Medium
28	7883	Selecting the latest construction parts takes a long time after returning from detail page	Fixed and validated in this release.	Medium

Item No.	Bug ID	Issue	Resolution	Impact
29	7891	Translations issue on test environment	Fixed and validated in this release.	Medium
30	7893	Optional & Optional description values are not displayed in Findings grid	Fixed and validated in this release.	Medium
31	7894	Optional Findings Are Not Displayed at the Bottom — Sorting Incorrect	Fixed and validated in this release.	Medium
32	7898	Excel import gives an error ; importing new object	Fixed and validated in this release.	Medium
33	7899	Object location map (openstreetmap) error	Fixed and validated in this release.	Medium
34	7907	Grouping & Column Selection Not Persisting After Navigating Back From Finding Detail Page	Fixed and validated in this release.	Medium
35	7911	Application Fails to Display Menus Immediately After Login	Fixed and validated in this release.	Medium
36	7912	Finding Creation: Previous Norm/Category Values Persist + Incorrect Default Category When Switching Norms	Fixed and validated in this release.	Medium
37	7914	Unable to delete subprojects – Save gets stuck even when deleting a single item	Fixed and validated in this release.	Medium

Item No.	Bug ID	Issue	Resolution	Impact
38	7915	Add Object takes too long and creates duplicate objects with a single click	Fixed and validated in this release.	Medium
39	7921	Logbook popup allows adding/editing notes even when Extra Info page is not in edit mode	Fixed and validated in this release.	Medium
40	7922	Incorrect Checkbox Behavior for 2008 Findings (Dash State Visible)	Fixed and validated in this release.	Medium
41	7923	Reference Finding ID Not Displayed in Part Overview Screen -Reference Finding(O-20250)-Column	Fixed and validated in this release.	Medium
42	7924	Maintenance (NEN 2767) Condition Score Not Updating in Parts Overview After Finding Changes (2025)	Fixed and validated in this release.	Medium
43	7925	Condition Score Not Updated at Part Level After Adding 2025 Findings via Decay Wizard	Fixed and validated in this release.	Medium
44	7938	Record remains in Task Grid even after performing "Inform Ready", instead of moving to Task History	Fixed and validated in this release.	Medium
45	7940	Dutch language setting not applied to reference field values	Fixed and validated in this release.	Medium

Item No.	Bug ID	Issue	Resolution	Impact
46	7941	Priority field is not populated when adding a 2025 finding despite valid risk matrix	Fixed and validated in this release.	Medium
47	7942	NEN 2767 standard labeling inconsistency – showing “NEN 2767-2008” instead of “NEN 2767” at Object and Parts level	Fixed and validated in this release.	Medium
48	7943	Aggregated Condition Score is not calculated for new Objects and Parts (with or without defects)	Fixed and validated in this release.	Medium
49	7949	Finding Optional Description reference field is not displayed in Accept environment.	Fixed and validated in this release.	Medium
50	7950	500 error when saving changes in Finding grid after creating a new Finding (Accept environment)	Fixed and validated in this release.	Medium
51	7951	Newly created Subproject does not load immediately and opens as empty until page refresh/navigation	Fixed and validated in this release.	Medium
52	7952	Findings should be ordered such that Normative defects are listed before Optional defects	Fixed and validated in this release.	Medium
53	7956	Reporting-Invalid value shown as default option in Format dropdown	Fixed and validated in this release.	Medium

Stories Delivered

Item No.	Story ID	Title	Description	Status
1	4487	"Implement coding adjustments (BIM)	Delivered as part of this release scope.	Released
2	5981	[Timebox] Set grouping and filtering remain when selecting another page	Delivered as part of this release scope.	Released
3	6237	Show checkbox for findings decay type in system management; reference findings	Delivered as part of this release scope.	Released
4	6388	Financiële rapporten benaming aanpassen	Delivered as part of this release scope.	Released
5	6978	Replace Seed by DataMigrator	Delivered as part of this release scope.	Released
6	7043	System management - Recalculate condition score	Delivered as part of this release scope.	Released
7	7247	Column definitions are not applied to construction part overview table	Delivered as part of this release scope.	Released
8	7296	Able to add external users as admin / viewer	Delivered as part of this release scope.	Released
9	7374	Add NEN2767 reference findings list	Delivered as part of this release scope.	Released

Item No.	Story ID	Title	Description	Status
10	7377	Add NEN 2767 - 2025 reference findings category selection to construction parts (Other)	Delivered as part of this release scope.	Released
11	7378	Update reference findings grid in system management	Delivered as part of this release scope.	Released
12	7418	Add NEN 2767 - 2025 support to Excel import/export	Delivered as part of this release scope.	Released
13	7428	Automatically populate NEN 2767 - 2025 defect list categories on construction parts	Delivered as part of this release scope.	Released
14	7434	# Sprint goal: Delivering excel import, work on NEN2767 2025 phase 1 and small improvements/ bug fixing	Delivered as part of this release scope.	Released
15	7491	Adjust inspection page detail (3 way merge screen)	Delivered as part of this release scope.	Released
16	7641	Planning: Informing ready multiples, adjust save/cancel icons grid	Delivered as part of this release scope.	Released
17	7661	Design Public API – ExternalReferenceCode in Construction Entity	Delivered as part of this release scope.	Released
18	7701	Restore default reports on acceptance 'Spacewell	Delivered as part of this release scope.	Released

Item No.	Story ID	Title	Description	Status
		acceptatie' tenant and change functionality		
19	7760	Excel Import - Remove restriction to import only multiple objects on Plus license	Delivered as part of this release scope.	Released
20	7821	Design for Optional Defects for NEN2767 2025	Delivered as part of this release scope.	Released
21	7826	Increase maximum storage capacity SQL Elastic Pool	Delivered as part of this release scope.	Released
22	7829	Document working of OP2 file	Delivered as part of this release scope.	Released
23	7830	Add NEN2767 reference findings list - Copy (add fields)	Delivered as part of this release scope.	Released
24	7839	NEN2767 2025 add to decay wizard	Delivered as part of this release scope.	Released
25	7840	Add NEN 2767 - 2025 support to the inspection app - backend	Delivered as part of this release scope.	Released
26	7852	[Public API] Resource Identifiers from DB-Generated IDs to GUIDs	Delivered as part of this release scope.	Released

Item No.	Story ID	Title	Description	Status
27	7861	OP2 export Azure Service Bus	Delivered as part of this release scope.	Released
28	7875	Display “Optional Finding” in Findings List for a Part	Delivered as part of this release scope.	Released
29	7889	NEN2767 2025 adjustments	Delivered as part of this release scope.	Released
30	7904	[POC] Local Agent With MCP Server to Consume Internal API	Delivered as part of this release scope.	Released
